Premier of Alberta

Office of the Premier, 307 Legislature Building, Edmonton, Alberta T5K 2B6 Canada

July 25, 2023

The Honourable Demetrios Nicolaides  
Minister of Education

Dear Minister:

I want to thank you for your service to this government and congratulate you on your new role as Minister of Education.

Our Cabinet is made up of talented, diverse, and experienced leaders and I am proud to share with you our responsibility to fulfill the mandate given to us by Albertans. We all love this beautiful province and want the best for our families and our future. Over the next four years, we will take clear and decisive action to grow and diversify our economy while ensuring our health, education and other core social programs are world class.

I have full confidence that our team will build on our solid foundation of stability, informed decision-making, and good governance to improve the lives of Albertans and help our province realize its potential.

Ensuring our children receive a world-class education is a top priority and focus of our government. Alberta's economy is creating tens of thousands of jobs in the modern economy, yet we are not doing enough to encourage Alberta students to pursue career paths with the most plentiful and lucrative employment opportunities. This is both hurting students and exacerbating our provincial labour shortage. We must do a better job of equipping Alberta's youth with the skills and direction they need to find meaningful employment in the economy we are building.

Premier of Alberta

Office of the Premier, 307 Legislature Building, Edmonton, Alberta T5K 2B6 Canada

July 21, 2023

The Honourable Rajan Sawhney  
Minister of Advanced Education

- Working with the Minister of Technology and Innovation to ensure appropriate governance of software engineers that does not compromise the tech industry's ability to attract needed software engineers from around the world.
- Acting as Alberta's lead advocate and champion of the skilled trades and professions to ensure, as early as junior high, that this education track has parity of esteem as a desirable education pathway that will lead to highly rewarding careers.
- In the context of skilled trades, taking a leadership role in meeting the evolving needs of the economy with a focus on ensuring journey persons obtain needed skills for the modern economy.
- In collaboration with the Minister of Education, reviewing the Skills for Jobs Task Force Report, and advance key recommendations from the Report pertaining to your ministry.
- As lead, working with the Minister of Health to develop streamlined auto-credentialling for front-line health care workers, doctors, nurses and paramedics.
- Continue working with career colleges and other educational institutions to develop pathways to become accredited to deliver diplomas and degrees.
- Working in cooperation with the Minister of Education, funding growth of "CAREERS" with public and separate school divisions to increase student participation in off campus programs/paid internships.
- Collaborating with the Minister of Education to develop and promote career educational scholarships in areas of labour shortage for Alberta's K-12 students.
- Assisting each ministry to execute on their mandate to design a ministry specific job attraction strategy that raises awareness for young Albertans (16-24), as well as adults changing careers, regarding the skilled trades and professions available in each economic sector including pathways for education, apprenticeship, and training

# WHY IS THERE A SHORTAGE OF SKILLED TRADE WORKERS AND HOW DO WE SOLVE IT?

- The [Canadian Apprenticeship Forum](#) predicts Alberta will need 26,000 new journeypersons and 51,000 new apprentices in the top 15 Red Seal trades by 2026 to meet industry demand.
- Across North America, roughly 40% of tradespeople will need to be replaced in the next 5 to 10 years, which includes approximately 40,00 skilled workers in Alberta. ([Source](#))
- By 2027, 21% of Canada's labour force will be 65 or older, creating a pressing need for skilled labourers to enter the trades now.

## What Is CTS?

Career and technology studies (CTS) is a provincially authorized curriculum for Alberta secondary schools designed on a pathways model to offer flexible programming using 1-credit courses. The course structure of CTS enables schools to design unique programs that meet the needs of students and draw on community resources.

The CTS program is designed to develop skills that senior high school students can apply in their daily lives when preparing for entry into the workplace or for further learning opportunities. Through the CTS program, students are provided with opportunities to personalize their learning, identify and explore their interests, manage transitions and build partnerships while developing basic competencies, that is, the attitudes and behaviours that people need to participate and progress in today's dynamic world of work.

# TRADES - WHAT'S OUT THERE?!?!

Now You Do It!

A photograph of a classroom or lecture hall. In the foreground, two young women are seated, smiling and looking towards the right. The woman on the left has long dark hair and is wearing a light green long-sleeved shirt. The woman on the right has long dark hair and is wearing a blue sleeveless top, holding a small notebook. In the background, other students are visible, including a man in a blue shirt standing and talking to someone. The setting appears to be a modern educational environment with warm lighting.

## What is the HSSIDIP?

The purpose of this content is to provide additional information to the video, "[What is the HSSIDIP?](#)"

- [More information about the Project](#)

The HSSIDIP is an employment-training program that transforms the lives of students who have an intellectual disability or autism, and contributes to a change in culture by changing the image we have of people with disabilities and the place they occupy in society.

## HSSIDIP's Rationale

- Statistics show that 80% of people with autism or intellectual disabilities are unemployed.
- The vast majority of students with autism or an intellectual disability who graduate from high school are unemployed despite the training they have received and the work placements they have completed during their schooling.
- Many of these students can enter the world of work and contribute to society through authentic work.
- The Project therefore aims to demonstrate that students with an intellectual disability or autism can, with adaptive measures, integrate into the world of work.

# CAREER PATHWAY ACTIVITY

Students build 1 or more pathways based on some of their current interests:

- Identify a career of interest
- Identify the Post-Sec program or continuing ed program required
- Identify HS courses required
- Identify potential internships / job shadow opportunities
- Identify income projection
- Identify job market in the area.
- Identify LOCATIONS in Alberta / Canada to complete the training program

**Pathways to Possibilities [Document](#)**

Activity - Pathway Planning Doc Pg. 11/12

Now You Do It!

## Pathway Planning

Career development requires students to develop enthusiasm for lifelong learning that carries them beyond learning in school. Ultimately, students make their links between school, career development and post-secondary options. Creating personalized pathways in CTS allows students the opportunity to expand their career goals and interests and make connections among CTS courses and other subjects.

This is Alvaro; he is starting Grade 10 next year and is excited about choosing his own CTS courses. He met with his school counsellor and together they came up with a pathway using the "Pathway Planner" and a list of the courses available at his school that will help him achieve his goals.

I am really interested ... in being creative. I love everything about the movies, the costumes, the types of camera shots and the angles the camera work is done from. I was really good in fashion and design studies in junior high.

✓	Code / Course Title
COM1005	Visual Composition
COM1105	Audio/Video
DES1020	The Design Process
DES1010	Sketch, Draw & Model
FAS1000	Fashion Illustration 1
FAS1030	Sewing Fundamentals
EST1140	Theatrical Makeup 1
COM2115	AV Production 1
COM2125	AV Postproduction 1
FAS2180	Creative Costuming
EST2140	Theatrical Makeup 2
COM3115	AV Production 2
FAS3180	Theatrical Costuming

I would like to complete this pathway because ... I would love to direct my own movie. This could lead to taking a program at NAIT and then work in the movie industry when I am finished school.

# • CLASSROOM PRESENTATIONS •

Our team loves to engage with high school students to provide career awareness. We offer a free 30–60 minute presentation that is engaging, fact-filled, and will have your students thinking about what they want to pursue after high school as well as opportunities they can pursue right now!

- We offer in-classroom or virtual presentations for students and parents.
- Our presentations can focus on: In-demand career pathways, internship opportunities, how to set youth up for success and prepare them for the future, exploration events, and more.

**BOOK PRESENTATION**

# Engage Students by focussing on Career Readiness

## ***GOALS - How might you infuse the following into your class and/or student interactions (focus + other)?***

1. Build student self efficacy by supporting their interaction with available tools (MyPass, Career Planning Tools, etc)
2. Lead students through activities with and without tech-tools to identify what career pathways their natural interests and aptitudes naturally align with.
3. Build student competencies in the areas identified as essential for tomorrow's employee.
4. Expand students knowledge of careers. Present & Future (Career Fair)
5. Expose students to the concept of Career Pathways.
6. Engage students in Career exploration activities and events. (Try-A-Trade)
7. Offer students opportunities for internships.
8. Offer students opportunities to experience post-secondary learning while still in high school
