THE CHARTER

STEM Collegiate is Alberta's first approved Collegiate charter school, a public charter school serving 500 grade 7–12 students in Edmonton. STEM Collegiate was established with a clear mandate: to be recognized as the premier center of innovation in STEM education and STEM curriculum development, and to graduate students who are knowledgeable leaders, global thinkers, and innovative risk takers prepared to solve key challenges in a rapidly changing world.

Our mission is to prepare students to be life-long learners, global communicators, creative problem solvers, and future industry leaders through innovative learning opportunities and an intellectually nurturing environment that emphasizes STEM knowledge and skill.

STEM Collegiate's charter focus is realized through the continuous development and enhancement of STEM-focused programming, including specialized option courses and enriched learning experiences that keep pace with emerging technologies alongside an intentional focus on creativity, innovation, and problem solving (including the ethical and strategic use of AI).

As a collegiate charter school, we are committed to building strong, sustainable pathways for students into STEM-related careers through active partnerships with post-secondary institutions and industry. A recent milestone includes a Memorandum of Understanding (MOU) with MIT Beaver Works Summer Institute, expanding access to MIT through a developed pathway of high school options courses and authentic project-based STEM learning.

STEM Collegiate Charter Goals
